\$5 \$ (668), \$3 Loteria (667)

Plan-O-Gram Considerations

Play Center HD (PHD) Self-Service Vending Machines

1. Bottom row – load 4" or less, including 2.5", length tickets ONLY
2. 2nd row from the bottom – load 6" or less, including 4" and 2.5", length ONLY
3. 3rd row from the bottom up to the top row – load any size ticket!
4. Reminder: the bin you load the game into has NO bearing on where the tickets are displayed to the players on the menu
5. Place the 4" x 4" game card in the bottom of the bin prior to loading the tickets in that bin. This will serve as a reminder to load that specific game once the tickets have sold through.

On-Counter Display Boxes and In-Counter Trays

1. You may use this Plan-O-Gram as a suggested guideline when merchandising these games in your instant ticket displays
2. Work with your District Manager to make sure you are getting a timely and sufficient shipment of top-selling games weekly.

If you have any questions or concerns, please discuss with your Maryland Lottery District Manager on their next visit.
